Suggested XStudio Hard Disk Organization - Central Audio/Log Server Installation

Network Server

Data Volume
(D:\)

Logs
Shared Folder

Program logs (schedule), audit data files (performance data), and, if enabled, a copy of the XStudio-generated inventory data file is located here. If one is created, the "emergency" log is also located in this folder.

Audio
Shared Folder

Audio files are located in a single folder (*.DAF)

100 mbs Minimum
LAN Speed

XStudio
WorkStation

LAN Hub/Switch

Additional PC's Running Utility
Applications Connect to LAN.
(ezSuite, XChange, etc)

Root Folder
(C:\)

dcsTools
(Default base application folder)

The installation program will install XStudio to this folder location as a default.

XStudio

The application folder for XStudio executable files, help files, and preference files (XStudio.ini). If self-generated inventory is used, the inventory data file is also located here.

Data
(Auto-Created)

Database folder. Tables containing Task, Actions, Events, External Device Information and Music Title/ Artist are stored in this folder.

Other dcsTools
Aplications

Audio
(Optional)

Optional backup audio folder. If the feature is enabled in XStudio and an audio file is not found on the server, an attempt will be made to play the audio from this folder.
